Sounds good. I put a request in with EZ Tech for the old version, just not sure when it will happen. Also Doane is not loaded in the library. There is an icon, but when you click on it says it isn't loaded on the computer.

Hey all, just an FYI I'm having trouble getting the original gfk database downloaded on my computer, so I can't run prices yet (iMap only lets me pull prices on products and not AI...so bizarre). In the meantime, I'm going to be pulling budgets for corn and soybeans.  
Best,  
Izzy
